

NORTHBRIDGE INSTITUTE OF TECHNOLOGY

Office of the Controller of Examinations

SEMESTER EXAMINATION REGULATIONS 2026

Document code: NIT/COE/SER/2026

Version: 1.0

Effective from: 1 August 2026

Classification: Academic policy - approved for student reference

1. Scope

1.1 These regulations govern end-semester, supplementary and other centrally administered examinations for undergraduate programmes at Northbridge Institute of Technology.

1.2 Continuous assessment, laboratory evaluation, project review and other course-level assessments remain subject to the approved course outline unless a provision of these regulations expressly applies.

1.3 The Controller of Examinations is responsible for examination schedules, registration, admit cards, secure conduct, result processing and official examination records.

2. Examination eligibility

2.1 A student may appear in an end-semester examination only when registered for the course, academically eligible, not subject to a relevant disciplinary restriction and compliant with the applicable attendance requirement.

2.2 The ordinary attendance requirement is at least 75 percent in the course. A student below that level must have written approval under the Attendance Relaxation Guidelines before eligibility is confirmed.

2.3 Eligibility for one course does not establish eligibility for another. The final eligible-candidate list shall be prepared course by course.

2.4 A student who has withdrawn from a course or whose registration was cancelled shall not appear in its examination.

3. Examination registration

3.1 Students shall submit the examination registration form within the period announced by the Controller of Examinations. Registration shall include every eligible regular and repeat course intended for examination.

3.2 The examination registration deadline for the Autumn 2026 semester is 12 October 2026 unless changed by a later numbered notice.

3.3 Late registration may be accepted for five working days after the ordinary deadline upon payment of the prescribed late fee. No registration shall be accepted after release of the final timetable except to correct an established institutional error.

3.4 A student is responsible for checking course codes, examination type and personal details before final submission.

4. Examination fees

4.1 The ordinary examination fee for regular courses is included in the semester academic fee unless a separate fee schedule provides otherwise.

4.2 Repeat, supplementary and late applications may carry the fees published for the relevant academic year. Payment does not by itself establish eligibility.

4.3 A failed payment transaction must be reported before the registration deadline with the transaction reference. Duplicate verified payments shall be refunded through the Institute finance process.

5. Timetable

5.1 The provisional timetable shall normally be published at least four weeks before the first examination. Students may report a direct timetable conflict within three working days.

5.2 The final timetable shall state the date, start time, duration and reporting instructions. Room allocation may be published separately.

5.3 The Institute may revise the timetable for an emergency or administrative necessity. A revised numbered notice supersedes the corresponding entry in the earlier timetable.

6. Admit cards

6.1 An admit card shall be issued after examination registration and eligibility verification. It may be withheld while an attendance, fee, identity or disciplinary hold remains unresolved.

6.2 The student must check the admit card and report an incorrect course code or personal detail to the Examination Office at least three working days before the relevant examination.

6.3 The admit card and Institute identity card must be produced at the examination venue. A temporary identity authorization may be issued under the procedure announced by Student Services.

7. Reporting and entry

7.1 Students should report at least thirty minutes before the scheduled start. Entry after thirty minutes from the start time shall not be permitted except under a written emergency direction from the Centre Superintendent.

7.2 A student shall not leave the examination room during the first thirty minutes or the final fifteen minutes of the examination.

7.3 Additional writing time or another approved accommodation shall be provided only when authorized before the examination under the Institute accessibility procedure.

8. Permitted and prohibited materials

8.1 Students may carry writing instruments and any material expressly permitted on the question paper or admit card.

8.2 Mobile phones, smart watches, communication devices, unauthorized notes and programmable storage devices are prohibited inside the examination room unless deposited as directed.

8.3 A calculator may be used only when its permitted category is stated for the course. Sharing calculators or other materials during the examination is not allowed.

9. Conduct during examination

9.1 Students shall follow seating instructions, maintain silence and comply with directions given by invigilators and the Centre Superintendent.

9.2 The answer booklet must contain the required registration and course details but shall not contain a name, message or identifying mark where anonymous evaluation is used.

9.3 No answer booklet or supplied examination material may be removed from the venue. Rough work must be completed in the space or booklet provided.

9.4 Suspected possession or use of unauthorized material shall be recorded and handled under the Unfair Means Regulations. The student shall be allowed to provide a written statement.

10. Absence and interrupted examinations

10.1 Absence from an examination ordinarily results in the recorded status Absent. A medical certificate does not convert an absence into an examination attempt or passing result.

10.2 A student unable to complete an examination because of a documented medical emergency may apply for the next permitted supplementary examination, subject to its eligibility rules.

10.3 If an examination is interrupted for all candidates due to an emergency, the Controller of Examinations may resume, reschedule or cancel it and shall issue a written notice.

10.4 A question-paper error affecting assessment shall be reviewed by the Board of Examiners. Any approved academic adjustment shall be applied consistently to all affected candidates.

11. Answer scripts

11.1 Answer scripts shall be collected, counted and transferred through the secure examination process. A student must confirm that every supplementary booklet is attached before leaving.

11.2 Scripts and evaluation records shall be retained for the period prescribed by the examination-record schedule and may be accessed only through an authorized review process.

12. Evaluation and moderation

12.1 Evaluation shall follow the approved marking scheme and course learning outcomes. Examiners shall report a material ambiguity or error discovered during evaluation.

12.2 The Institute may use moderation, second evaluation or statistical review where required by the approved assessment procedure.

12.3 Marks shall remain confidential until results are formally approved and published. Informal communication by an examiner does not constitute an official result.

13. Result publication

13.1 Semester results shall be published through the official student information system after approval by the competent academic authority.

13.2 A result may be temporarily withheld for an unresolved examination irregularity, eligibility issue, missing assessment component or administrative verification.

13.3 A student should report an apparent result-processing error within five working days of publication. Correction of a processing error is distinct from re-evaluation of academic judgment.

14. Re-evaluation and script access

14.1 A student may request re-evaluation only for courses and assessment components permitted under the Re-evaluation Policy 2026.

14.2 The application must be submitted within seven calendar days of result publication and may cover no more than three courses in a semester.

14.3 Payment of the prescribed fee and submission of the correct application do not guarantee a change of grade. The revised result, if any, shall replace the earlier result.

15. Supplementary examination

15.1 A supplementary examination may be offered for eligible failed or absent courses according to the Supplementary Examination Guidelines 2026.

15.2 Registration for a supplementary examination is separate from ordinary semester registration. The student must satisfy the announced deadline, fee and course eligibility conditions.

15.3 A supplementary examination does not remove the original attempt from the academic record.

16. Special arrangements and emergencies

16.1 The Controller of Examinations may arrange an alternate venue, additional invigilation or another reasonable measure for an approved accessibility, security or emergency requirement.

16.2 Requests for ordinary scheduling convenience, travel plans or private employment shall not be grounds for a special examination.

16.3 Where a public emergency affects a group of students, the Institute shall issue a common decision rather than require repetitive individual requests where practicable.

17. Appeals and records

17.1 An appeal concerning application of these regulations must be submitted to the Controller of Examinations within five working days of the disputed decision.

17.2 Academic judgment in the award of marks may be challenged only through the authorized re-evaluation process.

18. Commencement

18.1 These regulations take effect on 1 August 2026 and apply to examinations connected with courses beginning on or after that date.

18.2 A later numbered circular may amend a deadline or operational instruction. The later effective notice shall prevail for the matter it expressly changes.
