

NORTHBRIDGE INSTITUTE OF TECHNOLOGY

Office of the Controller of Examinations

RE-EVALUATION POLICY 2026

Document code: NIT/COE/REV/2026

Version: 1.0

Effective from: 1 August 2026

Classification: Academic policy - approved for student reference

1. Purpose

1.1 This policy provides a formal process for requesting fresh academic evaluation of an eligible written end-semester examination answer script.

1.2 Re-evaluation is intended to check whether the submitted answers have been assessed appropriately under the approved marking scheme. It is not a general appeal against course design, question-paper difficulty or academic standards.

1.3 Correction of an omitted mark, totaling error or result-processing error may be completed administratively and does not require academic re-evaluation when no judgment of answer quality is involved.

2. Assessments eligible for re-evaluation

2.1 A written end-semester examination evaluated through an answer script is eligible unless the course has been expressly excluded by an approved academic rule.

2.2 A student may apply for no more than three courses from the same semester examination result.

2.3 Eligibility does not depend on whether the original grade is passing or failing.

3. Assessments not eligible

a. Laboratory, studio, workshop, clinical, field or performance assessments.

b. Projects, dissertations, seminars, presentations, vivas or internship evaluations.

c. Continuous-assessment components such as quizzes, assignments and mid-semester examinations unless a separate rule applies.

d. Answer scripts already subject to a court, disciplinary or unfair-means process that prevents ordinary result review.

4. Application deadline

4.1 The application must be submitted within seven calendar days of official publication of the relevant semester result.

4.2 The publication date shown in the student information system is used to calculate the deadline. The day after publication is counted as day one.

4.3 A delayed application may be accepted only when a documented Institute system failure or another circumstance recognized by the Controller of Examinations prevented timely submission.

5. Application procedure

a. Open the Re-evaluation section in the official student information system.

b. Select no more than three eligible courses from the published result.

c. Confirm the course code, original grade and examination period.

d. Pay the prescribed fee for each selected course.

e. Submit the application and retain the acknowledgement number.

6. Fee

6.1 The applicable fee shall be the amount stated in the examination fee schedule for 2026-27.

6.2 A payment without a submitted application does not create a re-evaluation request. Failed or duplicate transactions must be reported using the payment reference.

6.3 The fee is refundable only when the Institute cannot process the application because the assessment is ineligible or the answer script is unavailable for a reason not attributable to the student.

7. Preliminary scrutiny

7.1 The Examination Office shall verify the deadline, course eligibility, application count, payment status and availability of the answer script.

7.2 An incomplete or ineligible application shall be rejected with a brief reason. A correctable system-record error may be resolved before rejection.

7.3 Acceptance for processing does not indicate that the original evaluation was incorrect.

8. Selection of re-evaluator

8.1 The answer script shall be assigned to a qualified examiner who did not perform the original evaluation, where reasonably practicable.

8.2 The identity of the student and the original examiner shall not be disclosed to the re-evaluator when anonymous processing is available.

8.3 The re-evaluator shall use the approved question paper, marking scheme and academic instructions applicable to the original examination.

9. Scope of re-evaluation

9.1 The re-evaluator shall assess every attempted answer and verify that marks have been awarded according to the approved scheme.

9.2 The re-evaluator may correct an award that is unsupported, an answer that was overlooked or a totaling issue discovered during review.

9.3 The student's answers shall not be improved, completed or interpreted using material not present in the submitted script.

10. Difference in marks

10.1 The re-evaluated marks shall replace the original marks when the resulting grade differs from the original grade.

10.2 When the difference is unusually large under the moderation threshold approved by the Examination Board, the script may be referred for an additional review before the result is finalized.

10.3 The finalized re-evaluation result may increase, decrease or leave unchanged the original marks and grade.

11. Processing time

11.1 The Institute will ordinarily publish the re-evaluation outcome within twenty working days after the application window closes.

11.2 A delay may occur when an examiner is unavailable, a moderation review is required or the answer script must be reconstructed from secure records.

11.3 The Examination Office shall issue a notice when a material delay affects a group of applications.

12. Publication of outcome

12.1 The outcome shall be published through the official student information system and shall show whether the result is changed or unchanged.

12.2 When a grade changes, the revised grade shall replace the earlier grade in the semester result and CGPA calculation.

12.3 The complete academic record may continue to show that the result was revised through the authorized process.

13. Effect on progression and registration

13.1 A student should continue with applicable registration and progression requirements while re-evaluation is pending unless Academic Affairs gives a written interim direction.

13.2 A later improved grade shall be applied to eligibility and progression decisions that have not become final, subject to programme rules.

13.3 The Institute is not responsible for a missed external opportunity based on an unchanged result while a re-evaluation application is pending.

14. Answer-script access

14.1 Where answer-script viewing is offered, it is a separate service from re-evaluation and must be requested through the procedure announced by the Examination Office.

14.2 Viewing allows the student to inspect the processed script but does not permit alteration, annotation, photography or removal of the script.

14.3 Failure to request viewing does not affect eligibility to apply for re-evaluation within the deadline.

15. Administrative error correction

15.1 A student who identifies an apparent omitted component, incorrect totaling or result-entry error should report it within five working days of result publication.

15.2 The Examination Office may correct a verified administrative error without charging a re-evaluation fee.

15.3 When review of the alleged error requires fresh academic judgment, the matter shall proceed only through an eligible and timely re-evaluation application.

16. Confidentiality and integrity

16.1 Examiner identities, internal moderation records and secure answer-script handling details shall remain confidential except where disclosure is legally required.

16.2 A student or another person shall not contact an evaluator to influence or inquire about a pending re-evaluation.

16.3 Fabricated payment evidence, altered result records or attempted interference may be referred for disciplinary action.

17. Review of procedural error

17.1 The academic judgment of the re-evaluator is final and is not subject to repeated re-evaluation.

17.2 A student may request review by the Controller of Examinations within three working days when the complaint concerns a procedural error, wrong script, incomplete processing or incorrect publication of the finalized result.

17.3 A procedural review shall not become a third academic evaluation unless the Examination Board determines that the authorized process was not completed.

18. Records

18.1 The Institute shall retain the application, payment status, evaluation record and result change according to the examination-record retention schedule.

18.2 Anonymized re-evaluation statistics may be used for assessment review, examiner development and quality assurance.

19. Commencement

19.1 This policy takes effect on 1 August 2026 and applies to results published for courses beginning on or after that date.

19.2 It shall be read with the Semester Examination Regulations 2026 and any later numbered notification expressly amending the re-evaluation process.
