

NORTHBRIDGE INSTITUTE OF TECHNOLOGY

Office of the Controller of Examinations

SUPPLEMENTARY EXAMINATION GUIDELINES 2026

Document code: NIT/COE/SEG/2026

Version: 1.0

Effective from: 1 August 2026

Classification: Academic policy - approved for student reference

1. Purpose

1.1 These guidelines regulate supplementary undergraduate examinations conducted by Northbridge Institute of Technology for eligible failed or absent courses.

1.2 A supplementary examination provides an additional assessment opportunity but does not replace ordinary course participation, academic registration or the requirements of the original course.

1.3 The Controller of Examinations shall announce the courses, registration period, fees, timetable and result date for each supplementary cycle.

2. Courses covered

2.1 A written theory course with an end-semester examination may be included when the department confirms that a valid question paper and examiner are available.

2.2 A laboratory, studio, project, seminar, internship, field or continuous-assessment component is not ordinarily offered through a supplementary written examination.

2.3 When a course includes both theory and practical components, the department shall specify which component must be repeated and whether the earlier passing component remains valid.

3. Student eligibility

3.1 A student who received grade F in an eligible course may register for the next announced supplementary examination for that course.

3.2 A student recorded Absent in the ordinary examination may register when the underlying course registration and attendance eligibility were valid.

3.3 A student whose ordinary examination eligibility was denied for attendance shortage may not use the supplementary examination to bypass that decision and must repeat the course unless a specific academic order provides otherwise.

3.4 A student subject to an unresolved unfair-means proceeding or relevant disciplinary restriction is not eligible until the authorized decision permits registration.

4. Number of courses

4.1 A student may register for no more than four supplementary courses in one examination cycle.

4.2 The timetable may limit the practical number of courses that can be attempted. The Institute is not required to arrange a special sitting for conflicts created by selecting multiple supplementary courses.

5. Registration

5.1 Supplementary registration is separate from ordinary semester examination registration and must be completed during the announced window.

5.2 The student shall select the correct course code, examination cycle and attempt type, pay the applicable fee and retain the acknowledgement.

5.3 A submitted registration remains subject to verification of course history, eligibility and any academic hold.

6. Registration period for the first cycle

6.1 For the first supplementary cycle following the Autumn 2026 results, registration opens on 11 January 2027 and closes at 5:00 p.m. on 18 January 2027.

6.2 Late registration may be accepted for three working days after the deadline with the prescribed late fee.

6.3 A later numbered notice may revise these dates. The later effective notice shall prevail.

7. Fees and acknowledgement

7.1 A separate fee is payable for each supplementary course according to the examination fee schedule for 2026-27.

7.2 A debit without a successful registration acknowledgement must be reported before the deadline with the payment transaction reference.

7.3 A verified duplicate payment shall be processed for refund. A fee is not refundable solely because the student chooses not to appear.

8. Timetable

8.1 The timetable shall normally be published at least ten calendar days before the first supplementary examination.

8.2 The first cycle is expected to be conducted from 1 February 2027 to 6 February 2027, subject to the final timetable.

8.3 A later timetable or emergency notice may revise the date, time or venue. Students are responsible for checking the final notice.

9. Admit cards

9.1 Admit cards shall be issued after registration and eligibility verification. The student must check the course code and personal details.

9.2 The supplementary registration acknowledgement is not an admit card and does not authorize entry to the examination venue.

9.3 An admit-card error should be reported at least two working days before the affected examination.

10. Conduct of examination

10.1 The reporting, identity, permitted-material and examination-conduct provisions of the Semester Examination Regulations 2026 apply to supplementary examinations.

10.2 The supplementary paper shall assess the same approved course outcomes as the ordinary end-semester examination, although the questions may differ.

10.3 No special paper shall be arranged for a student who misses the supplementary examination, except under an Institute-wide emergency decision.

11. Evaluation and grading

11.1 The supplementary examination shall be evaluated under the approved marking scheme and passing standard for the course.

11.2 Where the course grade includes retained continuous-assessment marks, the department shall apply the approved course rule. Continuous-assessment marks shall not be altered merely because a supplementary examination is taken.

11.3 The grade obtained after the supplementary examination shall be recorded under the Institute grade-replacement and transcript rules.

12. Result publication

12.1 Supplementary results shall ordinarily be published within fifteen working days after the final examination in the cycle.

12.2 A result may be withheld for an unresolved irregularity, missing academic record or evaluation verification.

12.3 A student should report an apparent processing error within five working days of result publication.

13. Re-evaluation

13.1 An eligible supplementary written examination may be submitted for re-evaluation under the Re-evaluation Policy 2026.

13.2 The application must be made within seven calendar days of supplementary result publication and counts toward the applicable course limit for that result cycle.

14. Academic effect

14.1 Passing a supplementary examination clears the failed or absent examination requirement but does not erase the original attempt from the academic record.

14.2 The revised grade shall be used for CGPA and progression according to the Undergraduate Academic Regulations 2026.

14.3 A result published after a registration or progression deadline shall be applied to decisions that remain open. It does not automatically reverse a completed external selection process.

15. Course revision or discontinuation

15.1 When a course code has changed, the department shall identify the approved equivalent or transition examination.

15.2 A discontinued course may be offered for a limited number of supplementary cycles or replaced with an approved course requirement.

15.3 The student must use the course code stated in the official transition notice rather than selecting a similar course independently.

16. Absence and emergencies

16.1 A student absent from a supplementary examination shall be recorded Absent. The examination fee will not ordinarily be carried forward.

16.2 A medical document explains the absence but does not create a right to another immediate sitting.

16.3 Where an emergency affects the conduct of an examination for a group of candidates, the Controller of Examinations may reschedule it through a numbered notice.

17. Irregularities

17.1 Suspected possession or use of unauthorized material shall be handled under the Unfair Means Regulations.

17.2 A pending irregularity may delay result publication for the affected course without delaying unrelated course results.

18. Review of eligibility decision

18.1 A student may request review of a rejected supplementary registration within three working days of receiving the decision.

18.2 The request must identify an incorrect course record, eligibility error, timely payment or another procedural issue. A request to waive an academic requirement is not a registration review.

19. Records

19.1 The Institute shall retain the registration, payment status, eligibility decision, attendance at the examination and final result as part of the examination record.

19.2 Students should retain their acknowledgement and admit card until the result and any authorized review are complete.

20. Commencement

20.1 These guidelines take effect on 1 August 2026 and apply to supplementary examinations connected with courses beginning on or after that date.

20.2 A later numbered notification may amend an operational date, fee or examination arrangement for a specified cycle.
