STUDENT FEE REFUND POLICY 2026

Document code: NIT/FA/REF/2026

Version: Version 1.0

Effective from: 1 July 2026

Classification: Financial policy - approved for student reference

1. Purpose and Application

1.1 This policy governs refunds arising from undergraduate admission cancellation, programme withdrawal, Institute cancellation, duplicate payment and refundable deposits during the 2026-27 academic year.

1.2 The policy applies together with the Tuition Fee Structure 2026. Hostel, mess and transport refunds are governed by the terms issued with the relevant allotment or service registration.

1.3 Dropping an individual course from a normal full-time semester does not ordinarily create a tuition refund because tuition is charged as a semester package. A separately charged repeat or Summer course may qualify only where this policy expressly permits a refund.

2. Definitions

2.1 Classes begin on the teaching start date stated for the relevant semester in the official academic calendar.

2.2 The withdrawal date is the date on which the Registrar's Office acknowledges a complete formal withdrawal request. The date on which a student stops attending classes is not the withdrawal date.

2.3 Tuition means the recurring tuition fee of INR 75,000 per semester. It does not include academic services, laboratory and technology, student activity or examination administration charges.

3. Withdrawal-Based Tuition Refund

Before classes begin - 80 percent of tuition, equal to INR 60,000 for the standard semester tuition.

Days 1-7 after classes begin - 60 percent of tuition, equal to INR 45,000.

Days 8-14 after classes begin - 40 percent of tuition, equal to INR 30,000.

Days 15-30 after classes begin - 20 percent of tuition, equal to INR 15,000.

After day 30 - No withdrawal-based tuition refund is available, except where another provision of this policy applies.

3.1 The day on which classes begin is day 1. Calendar days, including weekends and Institute holidays, are counted when determining the applicable refund band.

3.2 The percentage is applied to tuition actually payable after an approved scholarship or sponsorship adjustment. A pending scholarship application does not change the calculation.

4. Recurring Non-Tuition Charges

4.1 The academic services fee, laboratory and technology fee, student activity fee and examination administration fee are refunded in full only when a complete withdrawal request is acknowledged before classes begin.

4.2 After classes begin, recurring non-tuition charges are non-refundable because the related facilities, registration and semester services have commenced.

4.3 Where the Institute cancels an entire programme before or after classes begin, the associated tuition and recurring non-tuition charges are refunded in full.

5. One-Time Charges and Deposits

Admission processing fee - Non-refundable after admission processing begins.

Institute registration fee - Refundable only when admission is cancelled before Institute registration is completed.

Student identity card fee - Refundable only when card production has not begun.

Refundable caution deposit - Refunded after academic, library, hostel and financial clearances, less any approved deduction.

Hostel caution deposit - Handled under the residential clearance process and adjusted against residential dues or damage.

6. Additional Academic Charges

6.1 A supplementary examination or re-evaluation fee is refunded only when the Institute cancels the activity or when the application is withdrawn before administrative processing begins.

6.2 Transcript, duplicate grade report and replacement identity card charges are non-refundable after preparation of the requested item begins.

6.3 A separately charged repeat or Summer course cancelled by the Institute is refunded in full. Student-initiated withdrawal before its first class receives 80 percent of the separately charged tuition; no refund is available after that class begins.

7. Institute Cancellation and Duplicate Payment

7.1 If the Institute cancels a course for which a separate fee was charged, the associated fee is refunded in full. The Institute may offer an approved alternative course, but acceptance of the alternative is voluntary for refund purposes.

7.2 A verified duplicate payment is refunded in full and is not subject to the thirty-day withdrawal limit.

7.3 An excess payment caused by an approved ledger correction is returned or credited after adjustment of any other outstanding Institute dues.

8. Scholarships and Sponsorships

8.1 The student receives only the refundable portion of the amount personally paid. A scholarship or sponsor-funded portion is returned to the relevant scholarship account, sponsor or funding agency according to the sanction terms.

8.2 A scholarship credit that has not yet been disbursed is reversed rather than paid to the student. The refund calculation must not result in the student receiving more than the amount personally paid.

9. Application Procedure

9.1 The student must submit Form FIN-RF-06 through the student portal or the notified Finance and Accounts channel.

9.2 The application must include the withdrawal acknowledgement or cancellation notice, portal receipt or transaction reference, student bank details and any clearance document requested for a deposit refund.

9.3 A withdrawal-based application must be complete within thirty calendar days after classes begin. Institute-cancellation, duplicate-payment and deposit claims follow the specific timelines notified by Finance and Accounts.

9.4 Missing information is communicated to the student. The application date is preserved only when the original submission identifies the student, transaction and basis of the claim.

10. Processing and Payment

10.1 A complete approved refund is normally processed within twenty working days. Time required for bank rejection, sponsor confirmation or unresolved Institute clearance is excluded from this service period.

10.2 Payment is returned to the original source where technically possible. Otherwise, it is transferred to the verified bank account of the payer or authorised beneficiary. Cash refunds are not permitted.

10.3 Finance and Accounts issues a calculation showing the eligible amount, deductions, outstanding-dues adjustment and net refund.

11. Rejection and Appeal

11.1 An application may be rejected when the claim falls outside the applicable period, the charge is non-refundable, the payment cannot be verified or required documents remain incomplete after notice.

11.2 An appeal concerning calculation or eligibility must reach the Finance Officer within seven calendar days of the written decision. The appeal must identify the disputed clause and include supporting evidence.

11.3 An appeal does not create eligibility outside this policy. Clerical and transaction-matching errors may be corrected whenever verified.

12. Records and Interpretation

12.1 Refund applications, approvals, calculations and payment references are retained under the Institute's financial record-retention schedule.

12.2 Where an official cancellation notice or funding sanction contains a more specific refund instruction, that instruction applies to the named course, programme or student.

12.3 A later approved amendment issued by Finance and Accounts supersedes the corresponding provision from its stated effective date.
