

NORTHBRIDGE INSTITUTE OF TECHNOLOGY

Office of Academic Affairs

UNDERGRADUATE ACADEMIC REGULATIONS 2026

Document code: NIT/AA/UGR/2026

Version: 1.0

Effective from: 1 August 2026

Classification: Academic policy - approved for student reference

1. Purpose and application

1.1 These regulations govern undergraduate programmes offered by Northbridge Institute of Technology from the academic year 2026-27. They apply to students admitted in 2026 and to later cohorts unless a subsequent regulation expressly provides otherwise.

1.2 The regulations set minimum academic requirements for registration, credit completion, progression, assessment, project work and graduation. Programme-specific curriculum documents may impose additional requirements but shall not reduce the standards stated here.

1.3 Questions concerning interpretation shall be referred to the Office of Academic Affairs. A department may issue implementation instructions only when those instructions are consistent with these regulations.

2. Definitions

- a. Academic year means the period beginning with the Autumn semester and ending after the following Summer term.
- b. Credit means the academic value assigned to a course according to its scheduled learning hours and assessed work.
- c. Registered course means a course entered in the official student registration record for a semester.
- d. Backlog means a required course in which the student has not yet earned a passing grade.
- e. CGPA means the cumulative grade point average calculated from all credit-bearing courses completed at the Institute.

3. Academic structure

3.1 Each academic year normally consists of an Autumn semester, a Spring semester and an optional Summer term. The detailed teaching, registration and examination dates are published separately in the academic calendar.

3.2 A regular semester shall normally include at least fifteen weeks of instruction, excluding the end-semester examination period. The Summer term may be used for repeat courses, approved electives, internships or other academic activities.

3.3 Courses may be classified as institute core, programme core, programme elective, open elective, laboratory, project, seminar or internship. The approved curriculum shall state the classification and credit value of each course.

4. Semester registration

4.1 A student must complete registration within the period announced in the academic calendar. Registration is valid only after academic advising, selection of permitted courses and clearance of applicable institutional holds.

4.2 The normal semester load is 18 to 24 credits. A student may register for up to 27 credits with the written recommendation of the faculty adviser and approval of the Head of Department.

4.3 A student with a CGPA below 5.00 shall normally be restricted to a maximum of 20 credits in the following regular semester so that failed and essential prerequisite courses can be given priority.

4.4 Late registration may be permitted for up to five working days after the published deadline upon payment of the prescribed late fee. Registration after this period requires approval from the Dean of Academic Affairs and shall be allowed only for documented reasons.

5. Course prerequisites and changes

5.1 A student shall not register for a course without completing every prerequisite stated in the approved curriculum. Concurrent registration may be allowed only when the curriculum explicitly identifies the courses as co-requisites.

5.2 The add and drop period shall close at the end of the second week of instruction. A course dropped within this period will not appear as an attempted course in the semester grade report.

5.3 Withdrawal after the add and drop period may be approved up to the end of the eighth week. An approved withdrawal shall be recorded with the grade W and shall not contribute to the SGPA or CGPA.

5.4 A compulsory course may not be withdrawn if withdrawal would prevent the student from meeting a prerequisite required for progression in the following semester.

6. Assessment and grading

6.1 Course assessment may include quizzes, assignments, laboratory work, projects, mid-semester examinations and end-semester examinations. The course outline issued at the beginning of the semester shall state the assessment components and their weightages.

6.2 The Institute uses letter grades O, A+, A, B+, B, C, P and F for credit-bearing courses. The grade P is the minimum passing grade. Non-credit requirements may be recorded as Satisfactory or Unsatisfactory.

6.3 A student receiving the grade F must repeat the course when it is compulsory. An elective failed with grade F may be repeated or replaced by another approved elective, subject to curriculum requirements.

6.4 The semester grade point average is calculated using courses registered in that semester. The cumulative grade point average is calculated using all completed credit-bearing courses, subject to the Institute's approved grade-replacement rules.

7. Academic progression

7.1 A student is in good academic standing when the CGPA is at least 5.00 and the student is not subject to suspension under these regulations.

7.2 A student whose CGPA falls below 5.00 shall be placed on academic warning for the next regular semester. The student must meet the faculty adviser and follow the approved reduced-load study plan.

7.3 A student may progress to the third year only after earning at least 70 credits. Progression to the fourth year requires at least 108 earned credits and no more than four active backlogs.

7.4 A student who fails to earn at least 40 credits during any two consecutive regular academic years may be considered for academic suspension after review by the Institute Academic Committee.

7.5 Before suspension is imposed, the student shall be given an opportunity to submit documented circumstances and an academic recovery plan. The final decision shall be communicated in writing.

8. Repeating courses and grade improvement

8.1 A failed compulsory course shall be repeated at the earliest available offering, subject to timetable feasibility and prerequisite sequencing.

8.2 A student may repeat a passed course for grade improvement only once and only when the original grade is C or P. No more than two grade-improvement courses may be registered in a single semester.

8.3 Both attempts shall remain visible on the transcript. The better grade shall be used for CGPA calculation, but the academic record shall retain the complete attempt history.

9. Internship, project and seminar requirements

9.1 Every student must complete the internship requirement stated in the approved programme curriculum. An internship shall be evaluated only when it has prior departmental approval and the required report and supervisor assessment are submitted.

9.2 Registration for the final-year project requires at least 108 earned credits and completion of every project prerequisite listed by the department.

9.3 The project may be carried out individually or in an approved group. Each student remains responsible for demonstrating an identifiable contribution during review and final evaluation.

9.4 Where a programme includes a seminar or comprehensive review, successful completion is required before the final degree audit.

10. Graduation requirements

10.1 To qualify for the award of an undergraduate degree, a student must complete at least 160 credits and every compulsory non-credit requirement prescribed by the programme.

10.2 The student must obtain a final CGPA of at least 5.00, clear all compulsory courses, complete the internship and project requirements, and have no pending disciplinary penalty that prevents the award of the degree.

10.3 The normal duration of the programme is four academic years. All degree requirements must be completed within a maximum of seven academic years from the date of first registration, excluding formally approved breaks in study.

10.4 The Office of Academic Affairs shall conduct a degree audit after final results are published. Meeting the credit total alone does not establish graduation eligibility when a compulsory course or non-credit requirement remains incomplete.

11. Break in study and readmission

11.1 A student may apply for a temporary break in study on medical, financial or other serious grounds. The request should ordinarily be submitted before the semester registration deadline and must include supporting documents.

11.2 A break may be approved for one semester at a time and shall normally not exceed two consecutive semesters. The approved period will not be counted toward active semesters but remains subject to the maximum programme duration in clause 10.3 unless specifically exempted.

11.3 Readmission requires confirmation of the curriculum and regulations applicable on return. Where the curriculum has changed, the department may prescribe equivalent or bridge courses.

12. Academic records and appeals

12.1 Students are responsible for checking their registration record, grade report and earned-credit summary. Any discrepancy should be reported to the appropriate office within the period stated in the relevant notice.

12.2 An appeal concerning the application of these regulations must be submitted to the Dean of Academic Affairs within ten working days of the communicated decision. The appeal must identify the disputed clause and provide supporting material.

12.3 An appeal does not automatically suspend an academic decision. Interim relief may be granted only through a written direction of the Dean or the Institute Academic Committee.

13. Authority and commencement

13.1 These regulations were approved by the Institute Academic Council on 10 June 2026 and take effect on 1 August 2026.

13.2 The Institute may issue amendments through a formally numbered notification. Where an amendment conflicts with this document, the later effective provision shall apply.

Issued by:

Dean of Academic Affairs
