OFFICE ORDER

Circular No.: NIT/AA/ORDER/2026-08

Date: 06 July 2026

Page 1 of 2

SUBJECT: Course-equivalence mapping for approved transition to the B.Tech CSE Curriculum 2026

To: Registrar, Dean, Head of Computer Science and Engineering, Examination Office and affected students

Following approval of the 2026 curriculum, the competent authority orders the following equivalence arrangement for readmitted, transferred and specifically transitioned students.

1. This order applies only to students whose transition to the B.Tech Computer Science and Engineering Curriculum 2026 is recorded by Academic Affairs.
2. A passed legacy course mapped in Annexure A will satisfy the corresponding 2026 curriculum course and will carry its prerequisite effect.
3. Credits are counted once. A student may not retain credit for both a legacy course and its mapped replacement when they satisfy the same curriculum requirement.
4. A failed or incomplete legacy course does not create equivalence. The student must register for the mapped replacement unless another written transition instruction applies.
5. Departments shall verify affected records and submit corrections to Academic Affairs by 31 July 2026.
6. This order takes effect on 01 August 2026. Annexure A forms part of this order.

ANNEXURE A - APPROVED COURSE EQUIVALENCES

Reference: NIT/AA/ORDER/2026-08

Date: 06 July 2026

1. Legacy course mappings

1.1 **CP101 Programming Fundamentals** is equivalent to **CS101 Introduction to Programming** for the students covered by this order.

1.2 **CP201 Data Structures** is equivalent to **CS201 Data Structures** for the students covered by this order.

1.3 **OP201 Object-Oriented Programming** is equivalent to **CS202 Object-Oriented Programming** for the students covered by this order.

1.4 **CA201 Computer Architecture** is equivalent to **CS203 Computer Organization** for the students covered by this order.

1.5 **DB201 Database Principles** is equivalent to **CS204 Database Foundations** for the students covered by this order.

1.6 **MA202 Probability and Linear Algebra** is equivalent to **MA201 Linear Algebra and Probability** for the students covered by this order.

2. Prerequisite effect

2.1 An equivalence is effective only when the legacy course has a passing grade of P or higher. The mapped course then satisfies prerequisite checks in the 2026 curriculum.

2.2 For example, a passed CP201 mapping to CS201 may satisfy the CS201 portion of the prerequisite for CS301, CS302, CS304, CS401 or CS404. Every other stated prerequisite must also be satisfied.

3. Credit and registration treatment

3.1 The approved mapping retains the credit already earned under the student's transition record. It does not award additional credit and does not permit both courses to be counted separately.

3.2 A student who did not pass the legacy course must register for the mapped 2026 course. Registration remains subject to semester credit limits, timetable availability and other prerequisites.

4. Correction requests

4.1 A student who believes an approved legacy course is missing from the transition record must submit the grade report and admission or readmission order within five working days of publication of the updated record.

4.2 The Head of Department recommends a correction; Academic Affairs records the final decision. Similar titles or equal credit values do not establish equivalence without an approved mapping.
