

NORTHBRIDGE INSTITUTE OF TECHNOLOGY

Career Development and Industry Relations Office

MANDATORY INTERNSHIP GUIDELINES 2026

Document code: NIT/CDIR/INT/2026

Version: Version 1.0

Effective from: 1 August 2026

Classification: Academic and industry engagement policy - approved for student reference

1. Purpose and Scope

1.1 These guidelines govern the mandatory undergraduate industry internship at Northbridge Institute of Technology. They apply to Institute-facilitated and independently arranged internships used to satisfy a programme curriculum requirement.

1.2 The internship is an academic component. Employment, stipend, accommodation or a later job offer is not guaranteed by registration or Institute approval.

2. Academic Requirement

2.1 The B.Tech Computer Science and Engineering curriculum records the internship as CS491 Industry Internship carrying four credits.

2.2 The approved internship must include at least six weeks of supervised work. The six weeks may be continuous or divided into no more than two approved periods with the same host organisation.

2.3 An internship shorter than six weeks, including one ended early by the student or host, does not satisfy the requirement unless the department approves additional supervised work.

2.4 An internship may be on-site, hybrid or remote. The department must be able to verify supervision, working dates, assigned tasks and student participation.

3. Eligibility

3.1 Students normally undertake the internship after completing Semester VI. A department may approve an earlier period when the student has completed the supporting courses needed for the proposed work.

3.2 The student must be registered in the relevant programme, must not be under an active disciplinary suspension and must have no unresolved restriction that prevents participation at the host site.

3.3 Academic eligibility does not override a host organisation's lawful selection, safety, confidentiality or technical requirements.

4. Calendar and Deadlines

15 March 2027 - Last date to submit a request for an independently arranged Summer 2027 host organisation.

30 April 2027 - Deadline for departmental approval of the host, faculty coordinator and learning plan.

31 May-30 July 2027 - Recommended Summer internship period. Any approved six-week period within or overlapping these dates may be used.

13 August 2027 - Deadline for the internship report, host evaluation and completion evidence for Summer 2027.

4.1 A department may publish an earlier internal deadline. A later date applies only when an official Institute or departmental notice identifies the affected internship cycle.

5. Approval Before Joining

5.1 The student must submit the host name and address, supervisor contact, proposed dates, work area, work mode and a brief learning plan.

5.2 The department verifies academic relevance and appoints a faculty coordinator. Career Development and Industry Relations may verify the organisation and placement terms.

5.3 Work completed before written approval is not automatically eligible for credit. Retrospective approval is limited to documented administrative error and requires the Head of Department's recommendation.

6. Host and Supervision Requirements

6.1 The host must assign a supervisor who can confirm attendance, assigned work, conduct and performance. A student may not act as their own supervisor or use an organisation they control without additional departmental oversight.

6.2 The faculty coordinator maintains periodic contact and may request progress records, a virtual review or a site visit.

6.3 The host must provide a reasonably safe working environment and communicate applicable workplace, information-security and confidentiality rules.

7. Student Responsibilities

- a. Attend according to the approved schedule and maintain a weekly activity log.
- b. Follow host safety, confidentiality, data-protection and acceptable-use requirements.
- c. Inform the host supervisor and faculty coordinator promptly about absence, serious difficulty or a proposed change in work.
- d. Use only authorised data, systems, software and equipment.
- e. Submit original academic work and clearly identify confidential material that cannot appear in the report.

7.1 The student must complete at least 90 percent of scheduled working days. An absence exceeding three working days normally requires an approved extension so that the six-week requirement is met.

8. Change, Interruption and Withdrawal

8.1 A student may not change the host, work mode or approved dates without written permission from the faculty coordinator.

8.2 If a host ends the internship for reasons not caused by student misconduct, the department may approve transfer to another host and combine verified periods.

8.3 If the student withdraws or is removed for misconduct, the department determines whether completed work can be evaluated. Serious misconduct may be referred under Institute disciplinary rules.

9. Required Evidence

- a. Joining confirmation or host appointment letter.
- b. Weekly activity log approved by the host supervisor.
- c. Host completion certificate showing actual start and end dates.
- d. Host supervisor evaluation in the prescribed format.
- e. Student report and presentation or oral examination.

9.1 A certificate alone is not sufficient for academic credit when the report, evaluation or required review is missing.

10. Report Requirements

10.1 The report must describe the organisation, assigned problem, work completed, methods or tools used, results, learning outcomes and limitations.

10.2 Confidential details may be replaced by a technical summary approved by the host. Confidentiality does not remove the requirement to demonstrate substantial work.

11. Assessment

Host supervisor evaluation - 30 percent of the internship grade.

Internship report and activity log - 30 percent of the internship grade.

Presentation, demonstration or oral examination - 40 percent of the internship grade.

11.1 A passing grade of P or higher is required to earn the four credits. The department records a deferred result when required evidence is incomplete but a permitted completion period remains.

11.2 Fabricated evidence, copied reports or false host confirmation results in failure and may be handled as academic misconduct.

12. Stipend, Costs and Insurance

12.1 A stipend is determined by the host. The Institute does not guarantee payment or resolve a private stipend dispute unless the host arrangement was formally issued through the Institute.

12.2 Travel, accommodation, meals, equipment and personal insurance are the student's responsibility unless an approved offer states otherwise.

13. International Internships

13.1 An international internship requires academic approval and compliance with passport, visa, insurance, travel and host-country requirements.

13.2 Institute approval confirms academic suitability only. It does not replace immigration, safety or travel authorisation.

14. Failure and Repeat Arrangement

14.1 A student who does not meet the duration, evidence or assessment requirements must repeat the internship or complete an approved remedial placement.

14.2 A repeated internship must receive fresh approval. Work from a failed internship is not reused unless the department identifies specific verified components that remain valid.

15. Review and Interpretation

15.1 A request to correct a factual assessment or record error must reach the Head of Department within seven calendar days of result publication.

15.2 The approved programme curriculum determines the internship course code and credit value. These guidelines determine approval, conduct, evidence and assessment.
