

NORTHBRIDGE INSTITUTE OF TECHNOLOGY

Training and Placement Office

PLACEMENT ELIGIBILITY POLICY 2026

Document code: NIT/TPO/PLAC/2026

Version: Version 1.0

Effective from: 1 August 2026

Classification: Career services policy - approved for student reference

1. Purpose and Application

1.1 This policy states the Institute-level conditions for student participation in campus recruitment, internship-to-placement conversion and pre-placement offer processes.

1.2 Campus placement is a facilitation service. Registration, eligibility or participation does not guarantee an interview, selection or employment offer.

1.3 An employer may impose stricter academic, skill, citizenship, location, medical or programme criteria. The employer's published criteria apply in addition to this policy.

2. General Eligibility

2.1 A student must be enrolled full-time in an eligible programme and year group announced for the recruitment cycle.

2.2 A final-year undergraduate student must normally have earned at least 108 credits before the placement registration date.

2.3 A student with more than two active backlogs is not eligible for campus placement. An active backlog is a course with an F grade or another result requiring completion.

2.4 The minimum Institute CGPA for general participation is 6.00. An employer may require a higher CGPA or specified marks in earlier examinations.

2.5 The student must have no active disciplinary suspension and no unresolved finding of examination misconduct that restricts participation.

3. Academic Record Date

3.1 Eligibility is checked using results officially recorded at 5:00 p.m. on the closing date stated for a drive. A pending examination, supplementary registration or re-evaluation request does not count as a pass.

3.2 A later grade change affects only drives whose registration remains open, unless the employer and Training and Placement Office approve reconsideration.

3.3 The student must report a material record change promptly. Portal access created by an outdated result does not establish eligibility.

4. Placement Registration

4.1 Students must register through the placement portal, accept the participation declaration and upload the required resume and academic information by the cycle deadline.

4.2 The resume must use verifiable information. Qualifications, grades, projects, internships, employment and achievements may be checked against supporting records.

4.3 A student who does not intend to participate should not register for a drive. Repeated absence after registration may result in temporary restriction under Section 9.

5. Company-Specific Screening

5.1 The Training and Placement Office publishes the employer's programme, graduation year, CGPA, backlog, skill and other stated criteria before registration closes.

5.2 Where employer criteria are ambiguous, the Office seeks written clarification. Students should not rely on informal statements from peers, alumni or employees.

5.3 The employer controls shortlisting and selection. The Institute does not alter assessment scores or require an employer to interview every Institute-eligible student.

6. Pre-Placement Offers

6.1 A pre-placement offer received after an approved internship must be reported to the Training and Placement Office within three working days.

6.2 A verified and accepted pre-placement offer is treated as an employment offer for subsequent placement participation. Conditional offers remain subject to the conditions stated by the employer.

6.3 The internship grade and academic credits are determined independently under the Mandatory Internship Guidelines 2026.

7. Offer Categories and Further Participation

7.1 The Office may classify opportunities as regular or higher opportunity before registration, using criteria announced for the placement cycle.

7.2 After accepting a regular offer, a student may participate only in opportunities formally identified as higher opportunities. After accepting a higher opportunity, the student exits further campus placement unless an exceptional drive states otherwise.

7.3 A student may not hold two accepted campus offers at the same time. Acceptance of a permitted later offer requires written release from the earlier campus process.

8. Interviews, Assessments and Attendance

8.1 A registered student must attend scheduled tests, interviews, briefings and document-verification sessions or withdraw before the published cut-off.

8.2 An absence caused by examination, medical emergency or another documented serious reason must be reported as soon as practicable. The employer decides whether rescheduling is available.

8.3 Students must maintain at least 75 percent attendance in mandatory placement-readiness sessions announced for their cohort. An approved academic attendance relaxation does not automatically excuse a placement session.

9. Missed Activities and Temporary Restriction

9.1 A student who misses a registered drive without timely withdrawal or accepted reason receives a written warning for the first occurrence.

9.2 A second unexcused occurrence may result in restriction from the next two campus drives. A third may result in removal from the remaining cycle after review by the Placement Committee.

9.3 A restriction applies to Institute-facilitated drives and does not prevent the student from seeking employment independently.

10. Conduct and Integrity

10.1 Students must follow examination-style integrity during employer assessments and professional conduct during communication, interviews and visits.

10.2 Impersonation, unauthorised assistance, false documents, manipulated grades or deliberate misrepresentation results in immediate suspension from placement activity pending review.

10.3 Confidential employer questions, assessment material and candidate information must not be copied or distributed without permission.

11. Offer Communication and Acceptance

11.1 An offer is recognised when communicated by the employer through the Office or verified directly with the employer. Verbal indications are not treated as final offers.

11.2 The student must accept or decline within the stated period. No response by the deadline may be treated as a decline.

11.3 An accepted offer remains subject to the employer's background verification, graduation, medical, joining and other written conditions.

12. Withdrawal and Reneging

12.1 A student may withdraw before an employer's application cut-off without penalty. Withdrawal after shortlisting should be supported by a genuine reason and reported immediately.

12.2 Rejecting an accepted campus offer or failing to join without documented exceptional circumstances may result in removal from campus placement support and notification to the relevant employer.

12.3 The Institute does not compel a student to accept employment. However, acceptance creates responsibilities to the employer and affects access to limited campus opportunities.

13. Employer Changes and Offer Withdrawal

13.1 An employer may change a role, location, joining date or other term. The Office communicates verified changes but cannot guarantee restoration of the original term.

13.2 If an employer withdraws an offer for reasons not caused by student misconduct or misrepresentation, the student may re-enter eligible campus drives after review.

14. Independent Applications

14.1 Students may apply independently outside campus processes. They should disclose an accepted external offer when it affects availability for campus recruitment.

14.2 The Institute is not a party to an independently obtained offer and does not verify its terms unless asked to record it for placement statistics.

15. Data and Records

15.1 Academic records, resumes and contact details may be shared with participating employers for recruitment purposes. Students should upload only information required for the process.

15.2 The Office retains registration, attendance, selection and offer records under the Institute's placement record schedule.

16. Review and Interpretation

16.1 A student may request correction of an eligibility or attendance record within three working days of the portal decision.

16.2 The Placement Committee reviews sanctions and exceptional cases. An employer's final selection decision is not subject to academic appeal.

16.3 Where employer criteria are stricter than this policy, the employer criteria control that drive. A later Institute placement circular may amend operational dates or opportunity categories for the named cycle.
