

# NORTHBRIDGE INSTITUTE OF TECHNOLOGY

Office of the Controller of Examinations

## EXAMINATION REGISTRATION GUIDELINES 2026

Document code: NIT/COE/ERG/2026

Version: 1.0

Effective from: 15 August 2026

Classification: Academic policy - approved for student reference

### 1. Purpose

1.1 These guidelines describe the procedure for registering for centrally administered undergraduate examinations at Northbridge Institute of Technology.

1.2 They apply to regular, repeat and supplementary examination registrations unless a later examination notice states a different procedure for a specified examination period.

1.3 Registration records the student's intention to appear. It does not override course registration, attendance requirements, disciplinary restrictions or another condition of examination eligibility.

### 2. Registration period

2.1 Registration for the Autumn 2026 end-semester examinations opens on 28 September 2026 and closes at 5:00 p.m. on 12 October 2026.

2.2 A later numbered notice issued by the Controller of Examinations may extend or revise the dates. An effective extension notice shall prevail over the dates stated in these guidelines.

2.3 Students should not wait for the final day to register. A technical problem affecting only an individual device or internet connection does not automatically extend the deadline.

### 3. Students required to register

3.1 Every student intending to appear in a regular end-semester examination must complete examination registration, even when the examination fee is included in the semester fee.

3.2 A student repeating a failed course must include that course in the examination registration after confirming valid course or repeat registration with the department.

3.3 A student appearing only in a supplementary examination must follow the separate supplementary registration window announced for that examination.

### 4. Courses available for registration

4.1 The registration system displays courses based on the student's approved semester registration and eligible repeat-course record.

4.2 A missing course must be reported before the deadline. Students shall not select an unrelated course code as a temporary substitute.

4.3 A withdrawn, cancelled or unregistered course shall not be added to the examination registration unless Academic Affairs has corrected the underlying academic record.

### 5. Registration steps

- a. Sign in through the official student information system and open the Examination Registration section.
- b. Verify the programme, semester, name and student registration number.
- c. Select each eligible regular, repeat or approved backlog course intended for examination.
- d. Confirm the examination type and review any displayed attendance or administrative hold.
- e. Pay any applicable fee and submit the form before the stated deadline.
- f. Download or retain the acknowledgement containing the submission number and timestamp.

### 6. Student verification

6.1 Before submission, the student must confirm that every selected course code and title matches the academic record.

## **7. Fees and payment**

7.1 No separate examination fee is charged for ordinary regular courses when that fee is included in the semester academic fee.

7.2 Repeat, supplementary and late registrations are subject to the fee schedule published for the 2026-27 academic year.

7.3 A payment is complete only when the registration system records a successful transaction. A bank debit without system confirmation must be reported with the transaction reference.

7.4 A verified duplicate payment shall be forwarded for refund. Refund processing does not delay a valid registration already confirmed by the system.

## **8. Late registration**

8.1 Late registration is available for five working days after the ordinary deadline and requires payment of the prescribed late fee.

8.2 After the late period, registration may be accepted only to correct an established institutional error and only before release of the final examination timetable.

8.3 Personal oversight, travel, failure to check notices or an unreported payment problem is not normally an institutional error.

## **9. Correction period**

9.1 A student may request correction of a submitted registration within three working days of submission or by the close of the ordinary registration period, whichever is later.

9.2 The request must identify the submission number, affected course and correction required. The Examination Office may seek confirmation from the department.

9.3 Correction of an examination registration cannot be used to create academic course registration after the academic add and drop period.

## **10. Attendance and eligibility holds**

10.1 A course may appear in the registration form while attendance verification remains pending. Final eligibility will be determined under the Undergraduate Attendance Policy 2026.

10.2 A student below 75 percent attendance must obtain an approved relaxation decision, where eligible, before the examination eligibility list is finalized.

10.3 Submission of Form ATT-07 does not by itself remove an attendance hold.

## **11. Other holds**

11.1 The system may display a hold relating to identity verification, disciplinary restriction, unresolved academic registration or another officially recorded requirement.

11.2 The student must contact the office identified in the hold message. The Examination Office shall not remove a hold owned by another authorized office without written clearance.

## **12. Repeat and backlog courses**

12.1 A repeat course must be registered using the current valid course code or an approved equivalent identified by the department.

12.2 Where a curriculum revision has replaced a course, the department must map the earlier course to the approved examination or repeat arrangement before registration.

12.3 A student shall not register for two examinations scheduled at the same time without first reporting the conflict and receiving an approved resolution.

## **13. Registration acknowledgement**

13.1 The acknowledgement is evidence of submission but is not an admit card and does not guarantee final eligibility.

13.2 Students should retain the acknowledgement until results for the examination period have been published.

## **14. Admit-card processing**

14.1 Admit cards will be generated after the registration data is checked against attendance, academic registration and applicable holds.

14.2 Students must verify course codes and personal information on the admit card and report an error at least three working days before the affected examination.

14.3 An admit card withheld because of a pending matter will be released only after the responsible office records the required clearance.

## **15. Technical incidents**

15.1 A widespread system interruption confirmed by the Institute may result in an extension announced through a numbered notice.

15.2 For an individual technical incident, the student should capture the error message and report it to the service desk and Examination Office before the deadline.

15.3 Screenshots without a timestamp, student identifier or matching service record may be insufficient to establish that submission was prevented.

## **16. Cancellation and withdrawal**

16.1 Cancellation of examination registration does not cancel academic course registration. A course withdrawal must follow the academic regulations.

16.2 A student who decides not to appear after registration will ordinarily be recorded Absent unless the course is formally withdrawn or the examination registration is cancelled under an authorized process.

16.3 Fees paid for a repeat or supplementary registration are not refundable solely because the student chooses not to appear.

## **17. Special cases**

17.1 A student on an approved exchange, accessibility arrangement or other formally approved academic plan should contact the Examination Office during the ordinary registration period.

17.2 Requests for a special examination based only on personal travel, employment or scheduling convenience shall not be processed through registration correction.

17.3 An institutional emergency affecting a group of students shall be handled through a common notice where practicable.

## **18. Records and responsibility**

18.1 The Institute shall retain the submitted registration, transaction status, correction history and final examination-course list as part of the examination record.

18.2 Students remain responsible for reviewing official notices, meeting deadlines and preserving their acknowledgement.

## **19. Review and appeal**

19.1 A student may request review of a rejected registration or correction by the Controller of Examinations within three working days of the communicated decision.

19.2 The request must identify a procedural error, an incorrect institutional record or evidence of timely submission. A general request to overlook the deadline is not sufficient.

## **20. Commencement**

20.1 These guidelines take effect on 15 August 2026 for the Autumn 2026 examination cycle.

20.2 A later numbered examination notice may amend an operational date or procedure for a specified examination period.
